The Company was registered as a non-deposit accepting Non-Banking Financial Company ('NBFC-ND') with the Reserve Bank of India ('RBI') and has got classified as a Non-Banking Financial Company – Micro Finance Institution ('NBFC-MFI') with effect from February 9, 2015.

The Company is primarily engaged in providing micro credit and related activities.

2. Basis of preparation of financial statements

The financial statements of the Company have been prepared in accordance with generally accepted accounting principles in India (Indian GAAP). The Company has prepared these financial statements to comply in all material respects with the Accounting Standards notified under section 133 of the Companies Act, 2013 ('the Act'), read with Rule 7 of the Companies (Accounts) Rules, 2014 and the provisions of the RBI as applicable to a NBFC-MFI and NBFC-ND. The financial statements have been prepared on an accrual basis and under the historical cost convention except interest on loans which have been classified as non-performing assets and are accounted for on realisation basis.

The accounting policies adopted in the preparation of financial statements are consistent with those of previous year.

2.1 Summary of Significant Accounting Policies

a. Use of estimates

The preparation of financial statements in conformity with Indian GAAP requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods.

b. Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured.

- i) Interest income on loans given is recognised under the internal rate of return method. Income including interest or discount or any other charges on non-performing asset is recognised only when realised. Any such income recognised before the asset became non-performing and remaining unrealised shall be reversed.
- ii) Loan processing fees collected from customers are recognized on an upfront basis at the time of disbursement of loan.
- iii) Interest income on deposits with banks is recognised on a time proportion accrual basis taking into account the amount outstanding and the rate applicable.
- iv) All other income is recognised on accrual basis.

c. Tangible fixed assets

All fixed assets are stated at historical cost less accumulated depreciation and accumulated impairment losses, if any. The cost comprises purchase price and directly attributable cost of bringing the asset to its working condition for the intended use.

d. Intangible assets

Computer software costs are capitalised and amortised using the written down value method at a rate of 40% per annum.

e. Depreciation

Depreciation on tangible fixed assets is provided on the written down value method using the rates arrived at based on useful life of the assets prescribed under Schedule II of the Act which is also as per the useful life of the assets estimated by the management.

f. Impairment of assets

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.

After impairment, depreciation is provided on the revised carrying amount of the asset over its remaining useful life.

g. Leases (where the Company is the lessee)

Leases where the lessor effectively retains substantially all the risks and benefits of ownership over the leased item, is classified as operating leases. Lease rental payments under operating leases are recognized as an expense in the statement of profit and loss on a straight line basis over the lease term.

h. Foreign currency transactions

- i) All transactions in foreign currency are recognised at the exchange rate prevailing on the date of the transaction.
- ii) Foreign currency monetary items are reported using the exchange rate prevailing at the close of the financial year.
- iii) Exchange differences arising on the settlement of monetary items or on the restatement of Company's monetary items at rates different from those at which they were initially recorded during the year, or reported in previous financial statements, are recognised as income or as expenses in the year in which they arise.

Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income Tax Act, 1961, enacted in India. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.
- ii) Deferred income taxes reflect the impact of timing differences between taxable income and accounting income originating during the current year and reversal of timing differences for the earlier years. Deferred tax is measured using the tax rates and tax laws enacted or substantively enacted, at the reporting date
- iii) Deferred tax assets are recognised for deductible timing differences only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. - iv) The carrying amount of deferred tax assets are reviewed at each reporting date. The Company writes-down the carrying amount of deferred tax asset to the extent that it is no longer reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which deferred tax asset can be realised. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

k. Earnings per share

Basic earnings per share are computed by dividing the net profit attributable to the equity shareholders by the weighted average number of equity shares outstanding during the year. For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to the equity shareholders and the weighted average number of shares outstanding during the year is adjusted for the effects of all dilutive potential equity shares.
